

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Feature: As a user I want to manage the tally counter using the plus sign

Scenario: User increases tally counter value using the button with the plus sign on it until it reaches a certain maximum value

Given that I have an amount and I want to increase it by 1

When I press the + button

Then tally counter value that is currently on increases by 1 until it reaches a maximum value that is set

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: As a user I want to manage the tally counter using the negative sign

Scenario: User increases tally counter value using the button with the negative sign on it until it reaches a certain minimum value

Given that I have an amount and I want to decrease it by 1

When I press the - button

Then tally counter value that is currently on decreases by 1 until it reaches the minimum set value
